

## Sensor TU1/CO-0E

# Ideal for applications in the agriculture world

PHOTOELECTRICS

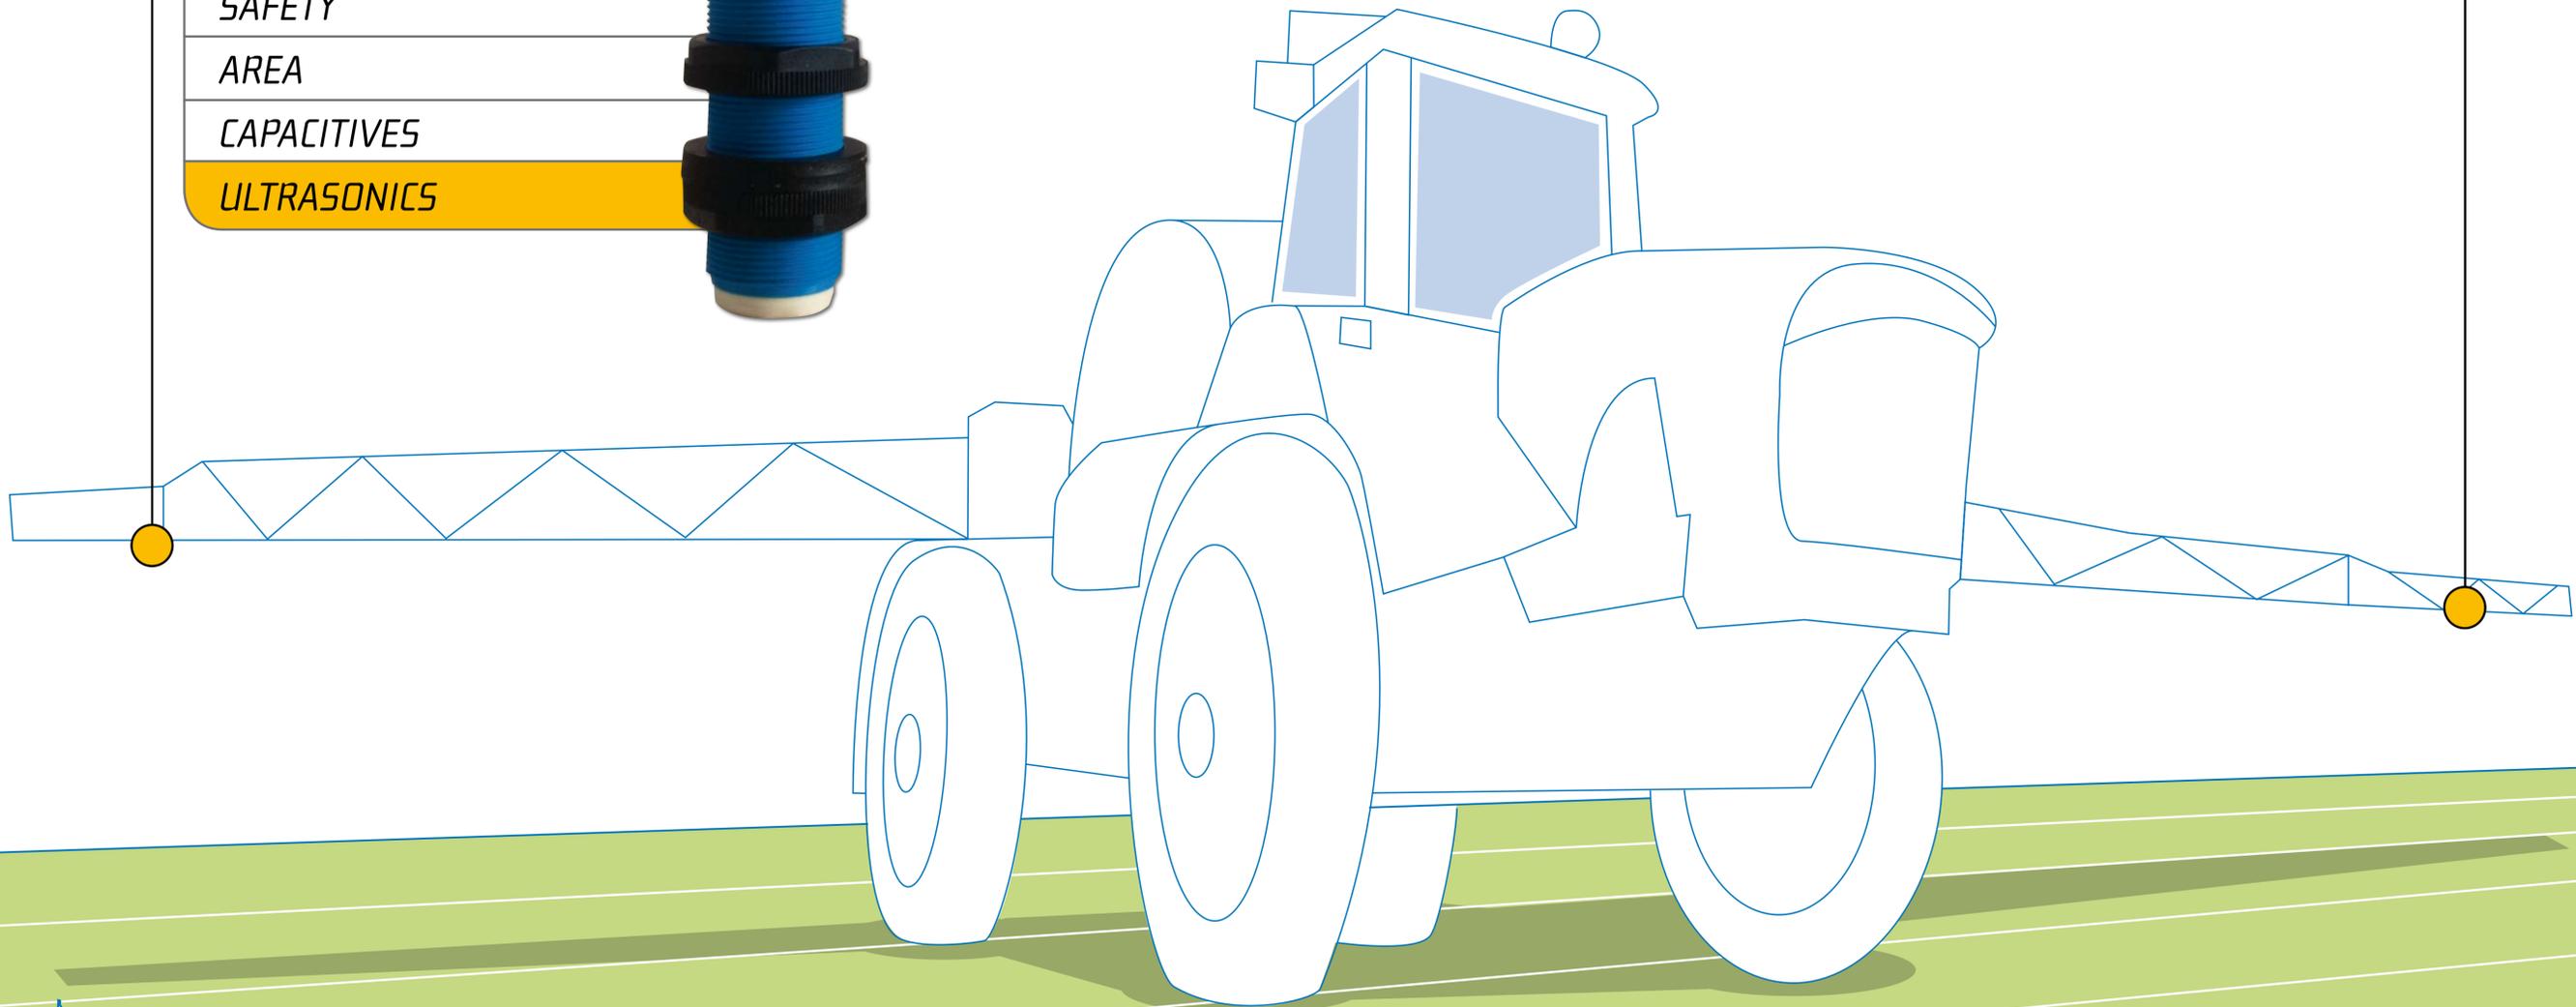

PROXIMITY

SAFETY

AREA

CAPACITIVES

ULTRASONICS

In the agricultural machine for spread of herbicidal TU1 ultrasonic sensor **is the best application to notice the presence and the height of the plantations**. TU1 is placed at the extremities of machine and it can automatically puts the diffuser in a safety position both effecting U-turn and when working on uneven road surface. You can thus reduce risks and costs.  
**MD. Sensors serving industrial automation.**
