- ULTRASONIC

Ideal for potentially explosive environments

Inductive, photoelectric and area sensors with ATEX Category 3 certification could be used in presence of explosive atmospheres caused by gas and powder. Which are their applications? **Filling bags packaging machine** *(chemicals, flours, corn and seeds, fertilizer),* **painting system** *(wood, metal, glass)* **and mills.** *BX area sensors are available either with ATEX Category 2 certification.* **MD. Sensors serving industrial automation.**
