MD Micro Detectors introduces on the market the new **URS** series **control unit** for optical sensors of high power. The unit is available in 3 and 1 channel versions, it is protected against interferences and admits the **connection in series, up to 14 independent sensors**. The **DG** series **through beams** with a **IP68** protection degree, with **sensing distance** up to **75m** can guarantee the **perfect reading through high pressure water jets under ensuring optimal protection of the vehicle**.

MD. Sensors serving industrial automation.
